### Problems/Questions: contact Deb at benso010@umn.edu or 612-626-2476

**Do not run the X-ray for longer than an hour at a time, if you do so the machine could over heat and shut off thus compromising your run.**

**if you are doing a 1+ hour run then run the first hour, stop the Xray, leave unit on and let sit for 15 minutes and resume run for remaining time.**
